

## Introduction

This is the Conflict Minerals Report (the 'Report') of British American Tobacco p.l.c. ('BAT')<sup>1</sup>. It has been prepared in accordance with Rule 13p-1 (the 'Rule') under the US Securities Exchange Act of 1934, as amended (the 'Exchange Act'), for the year ending 31 December 2021 (the 'Reporting Period'). This is BAT's third Report subject to the Rule, following its acquisition of Reynolds American Inc. in July 2017.

'Conflict Minerals' are defined by the US Securities and Exchange Commission (the 'SEC') as columbite-tantalite (coltan), cassiterite, gold and wolframite, or their derivatives, which are limited to tantalum, tin and tungsten (collectively, '3TG'). The Rule applies to companies required to file reports with the SEC under Section 13(a) or 15(d) of the Exchange Act. If such companies manufacture or contract to manufacture products that contain 3TG necessary to the functionality or production of the product ('in-scope products'), they are required to:

- Conduct in good faith a reasonable country of origin inquiry ('RCOI') to determine whether any of the 3TG originated in the Democratic Republic of the Congo or an adjoining country (the 'Covered Countries'), or are from recycled or scrap sources; and
- Disclose on a conflict minerals report filed as an exhibit to Form SD certain information relating to, among other things, the results of such RCOI.

Please refer to the requirements of Form SD for further details and definitions of many of the terms used in this Report<sup>2</sup>.

## Company Overview

BAT is a leading, multi-category consumer goods business. Our Group headquarters is based in the UK and we have operations in 175 markets worldwide, employing over 52,000 people. In 2021, our Group revenue was £25,684 million.

The Company has shares listed on the London Stock Exchange (BATS), the Johannesburg Stock Exchange (BTI) and, as American Depositary Shares, on the New York Stock Exchange (BTI).

Electronic components that may contain 3TG are used in the Group's vapour products (also known as e-cigarettes) and tobacco heating products. The Group's supply chains are complex, and there are many third parties in the supply chain between Group companies and the mines from which minerals are originally sourced and the smelters and refiners that process those minerals.

## Applicability Assessment

In 2021, we conducted an analysis of the Group's products that are likely to contain 3TG. As a result of this analysis, with respect to the Reporting Period, we reasonably determined that the Group manufactures, or contracts to be manufactured, two in-scope product categories:

- Vapour products – devices and related accessories, such as e-liquid pods and battery chargers, under our global brand Vuse, as well as some local brands of our subsidiaries<sup>3</sup>; and

---

<sup>1</sup> British American Tobacco p.l.c. is the publicly-traded holding company for the British American Tobacco Group of companies. References in this report to 'BAT', 'Group', 'Company', 'we', 'us' and 'our' when denoting opinion refer to British American Tobacco p.l.c. and when denoting business activity refer to British American Tobacco Group operating companies, collectively or individually as the case may be.

<sup>2</sup> Form SD is available at [www.sec.gov/about/forms/formsd.pdf](http://www.sec.gov/about/forms/formsd.pdf).

<sup>3</sup> This includes the Ten Motives brand in the UK and the Polish brands Milp and Volish.

- Tobacco heating products – devices, consumables used with such devices and related accessories, such as battery chargers, under our glo brand.

## RCOI and Due Diligence Framework

As required by Form SD, we conducted a good faith RCOI regarding the Group's in-scope products for the Reporting Period. This good faith RCOI was designed to determine whether any of the 3TG used in our in-scope products originated in the Covered Countries or if they were from recycled or scrap sources.

In accordance with the Rule, our due diligence process is designed to align with the internationally-recognised five-step due diligence framework set out in the Organisation for Economic Co-operation and Development Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas (the 'OECD Framework')<sup>4</sup> as applicable for 3TG and downstream companies (as 'downstream companies' is defined in the OECD Framework), as follows:

### Step 1: Establish Group Systems

We have worked to integrate Conflict Minerals reporting into our existing Group-wide systems as part of our wider human rights strategy and supply chain due diligence procedures.

This has included:

- Adopting a policy** for the responsible sourcing of 3TG and communicating this policy to suppliers in our Supplier Code of Conduct (the 'Code') since 2018. An updated version of the Code took effect in January 2022.

The Code states that we expect our suppliers to "ensure responsible sourcing of 'conflict minerals' [...] and where products or materials supplied to the Group contain such minerals, suppliers should work to exercise appropriate due diligence and perform a reasonable country of origin inquiry, including requiring its suppliers to engage in similar due diligence".

The Code has been endorsed by the Board of British American Tobacco p.l.c. (the 'Board'), and our Operations Director owns the policy on behalf of the Management Board.

The Code applies to suppliers to any BAT Group company worldwide and is incorporated into our contractual arrangements. It is publicly available at [www.bat.com/principles](http://www.bat.com/principles) and communicated to suppliers as part of our onboarding processes.

- Structuring internal Group management** to support Conflict Minerals due diligence within our existing human rights supply chain due diligence ('SCDD') programme.

The SCDD programme is overseen by the Group's SCDD governance committee, a cross-functional governance committee, including the Group Head of Procurement, Heads of Direct, Indirect and New Categories Procurement, Head of Environment, Social and Governance (ESG), Head of Environment, Health and Safety (EHS), Head of Trade Compliance and Senior Legal Counsel. Responsibility for overseeing the design, implementation and results of the Group's Conflict Minerals due diligence has been incorporated into the remit of the Group's SCDD governance committee.

The Operations Sustainability Forum, chaired by the Group's Operations Director, has oversight over the Conflict Minerals reporting process as part of its approval of this Report.

- Participating in cross-industry efforts** to support responsible minerals sourcing, as part of our membership of the Responsible Minerals Initiative ('RMI' – formerly the Conflict-Free Sourcing Initiative). We received approval in 2021 to join the RMI in 2022 and data obtained through our membership will inform our future reporting.

---

<sup>4</sup> The OECD Framework is available at [www.oecd.org/corporate/mne/mining.htm](http://www.oecd.org/corporate/mne/mining.htm).

- d) **Establishing a system of controls** and transparency for identifying in-scope products and suppliers. This has included incorporating Conflict Minerals clauses into contractual arrangements with in-scope suppliers. These clauses require such suppliers to confirm compliance with conflict minerals laws, establish conflict minerals due diligence procedures and perform a RCOI. In 2021, via our new supplier due diligence platform, suppliers were required to identify if Conflict Minerals were used in the products provided to BAT with an additional questionnaire triggered based on their response.
- e) **Strengthening engagement with suppliers** on the issue of responsible mineral sourcing through communicating our Code as part of our onboarding processes. We also provided all in-scope suppliers with detailed guidance to help them understand their Conflict Minerals due diligence obligations, details of our expectations and approach, and how to complete the Conflict Minerals Reporting Template ('CMRT')<sup>5</sup>. The CMRT is a standardised reporting template developed by the RMI to collect information on the chain of custody of 3TG throughout supply chains, consistent with the OECD Framework.
- f) **Providing a grievance mechanism** through the Group's Speak Up channels. These independently managed channels are available to anyone working for, or with, a Group company to raise concerns online at [www.bat.com/speakup](http://www.bat.com/speakup), by text or by telephone hotlines, 24 hours a day, seven days a week and in multiple languages. These channels can be used confidentially and anonymously, without fear of reprisal.

## Step 2: Identify and Assess Risks in the Supply Chain

For the Reporting Period, we sent requests to all in-scope suppliers to complete the CMRT. The suppliers' responses were checked and analysed and, where required, we followed up with suppliers for further information or clarification.

We then compared details of the smelters and refiners provided by our in-scope suppliers against the RMI's Responsible Minerals Assurance Process ('RMAP') database<sup>6</sup> to determine if the smelters and refiners that source from the Covered Countries are 'RMAP Conformant'.

RMI defines smelters and refiners as RMAP Conformant if they have successfully completed an independent RMAP audit. The audit verifies that they have the systems and processes in place to support responsible sourcing of raw materials and can provide evidence to support their sourcing activities; and that they maintain good standing in the programme through a continual validation process.

The RMI states that "the RMAP standards are developed to meet the requirements of the OECD Due Diligence Guidance, the Regulation (EU) 2017/821 of the European Parliament and the US Dodd-Frank Wall Street Reform and Consumer Protection Act".

## Step 3: Design and Implement a Strategy to Respond to Identified Risks

The Group's SCDD governance committee oversees the design, implementation and findings of our Conflict Minerals due diligence procedures. The committee continues to monitor progress, risks and emerging issues to identify opportunities to strengthen our response to identified risks.

## Step 4: Utilise Results of Independent Third-Party Audits of Smelter and Refiner Due Diligence Practices

As Group companies are far removed from the smelters and refiners that process Conflict Minerals in the supply chain, we rely on cross-industry initiatives, such as RMI's RMAP, which conduct independent third-party audits of smelters and refiners in our supply chain.

<sup>5</sup> The CMRT is available at [www.responsiblemineralsinitiative.org/reporting-templates/cmrt/](http://www.responsiblemineralsinitiative.org/reporting-templates/cmrt/).

<sup>6</sup> RMI's smelter database is available at [www.responsiblemineralsinitiative.org/smelter-links/smelter-database/](http://www.responsiblemineralsinitiative.org/smelter-links/smelter-database/).

As described in step 2, we review whether the smelters or refiners identified by our in-scope suppliers to be sourcing 3TG from the Covered Countries are listed as RMAP Conformant, based on the information made available by the RMI.

We encourage our suppliers to engage with their own upstream suppliers to ensure smelters or refiners that do source from the Covered Countries also undergo independent third-party audits in accordance with the OECD Framework as applicable to 3TG and upstream companies (as 'upstream companies' is defined in the OECD Framework).

### **Step 5: Reporting Annually on Supply Chain Due Diligence**

Our Conflict Minerals Reports are filed with the SEC and are available at [www.bat.com/reporting](http://www.bat.com/reporting).

## **Determination**

As we do not directly purchase raw minerals, ores or 3TG, we must rely on our in-scope suppliers to gather information about smelters and refiners in our supply chain. We received responses from all in-scope suppliers for the Reporting Period.

Based on the RCOI and due diligence efforts described above, we have determined that certain 3TG contained in our in-scope products may have originated from Covered Countries and may have been processed by smelters that are not listed as RMAP Conformant.

In conclusion, we are unable to determine the origin of certain 3TG contained in our in-scope products, despite our RCOI conducted in good faith.

The full list of smelters and refiners declared by our in-scope suppliers is included in the [Annex](#).

## **Continuous Improvement Efforts to Mitigate Risk**

In 2022, we plan to build upon the following steps:

- Continue mapping our New Categories supply chain and building relationships with our suppliers;
- Provide Conflict Minerals training for relevant Procurement managers to build their capacity for engaging in-scope suppliers on the issue;
- Encourage in-scope suppliers to put in place, if not yet implemented, Conflict Mineral sourcing policies and due diligence measures aligned to the OECD Framework;
- Encourage in-scope suppliers to further strengthen due diligence efforts, consistent with the OECD Framework, to help improve the quality and completeness of information provided to us; and
- Engage in-scope suppliers to encourage smelters who are not listed as RMAP conformant in their supply chain to achieve, or make progress towards, RMAP Conformance.

## Annex

All smelters and refiners declared by our in-scope suppliers.

## Further Information

### About this Report

This is our third Conflict Minerals Report in accordance with the Rule under the Exchange Act.

The material in this Report is not provided for product advertising, promotional or marketing purposes. This material does not constitute and should not be construed as constituting an offer to sell, or a solicitation of an offer to buy, any of our products. Our products are sold only in compliance with the laws of the particular jurisdictions in which they are sold.

References in this Report to reports and information on websites, including the web address of BAT, have been included as inactive textual references only. These websites and the information contained therein or connected thereto are not intended to be incorporated into or to form part of this Report.

### Forward-looking Statements

This Report contains certain forward-looking statements, including “forward-looking” statements made within the meaning of the US Private Securities Litigation Reform Act of 1995. These statements are often, but not always, made through the use of words or phrases such as “believe,” “anticipate,” “could,” “may,” “would,” “should,” “intend,” “plan,” “potential,” “predict,” “will,” “expect,” “estimate,” “project,” “positioned,” “strategy,” “outlook,” “target” and similar expressions.

These include statements regarding our intentions, beliefs or current expectations concerning, amongst other things, our results of operations, financial condition, liquidity, prospects, growth, strategies and the economic and business circumstances occurring from time to time in the countries and markets in which the Group operates, including the projected future financial and operating impacts of the COVID-19 pandemic.

All such forward-looking statements involve estimates and assumptions that are subject to risks, uncertainties and other factors. It is believed that the expectations reflected in this Report are reasonable but they may be affected by a wide range of variables that could cause actual results to differ materially from those currently anticipated. Among the key factors that could cause actual results to differ materially from those projected in the forward-looking statements are uncertainties related to the following: the impact of competition from illicit trade, the impact of adverse domestic or international legislation and regulation, the inability to develop, commercialise and deliver the Group’s New Categories strategy, adverse litigation and dispute outcomes and the effect of such outcomes on the Group’s financial condition, the impact of significant increases or structural changes in tobacco, nicotine and New Categories related taxes, translational and transactional foreign exchange rate exposure, changes or differences in domestic or international economic or political conditions, the ability to maintain credit ratings and to fund the business under the current capital structure, the impact of serious injury, illness or death in the workplace, adverse decisions by domestic or international regulatory bodies, and changes in the market position, businesses, financial condition, results of operations or prospects of the Group.

The forward-looking statements reflect knowledge and information available at the date of preparation of this Report and the Group undertakes no obligation to update or revise these forward-looking statements, whether as a result of new information, future events or otherwise. Readers are cautioned not to place undue reliance on such forward-looking statements. Additional information concerning these and other factors can be found in BAT’s filings with the SEC, including the Annual Report on Form 20-F and Current Reports on Form 6-K, which may be obtained free of charge at the SEC’s website at [www.sec.gov](http://www.sec.gov).
